

To whom it may concern,  
I am writing to tell you XM Satellite Radio should broadcast Instant Traffic & Weather. I don't live in one of the markets that they broadcast, but I do travel to one of them. Because I don't live in that market, I don't know where I could find dependable and accurate information on "over the air" radio stations. With XM's Instant Traffic & Weather I know that if I join a reports in progress, I haven't missed much, because it is always there and always on. Please don't leave this traveler in the dark. Let XM provide this to me and the many traveling americans out there.
